

A Postdoctoral Research Associate position is available at Stowers Institute for Medical Research. The successful candidate will participate in research in one or more of the following areas: identification of neural circuitry involved in specific behavioral tasks, the molecular mechanism of circuit specification and the development and plasticity of neural circuitry. The lab employs a combination of methodologies including molecular genetics, modern imaging techniques, electrophysiology and behavioral assays. More details can be found at <http://www.stowers.org/labs/yulab.asp>

Qualified candidates are expected to be recent recipients of a doctoral degree in the life sciences, chemistry or biomedical engineering. Candidates with experience in one or more of the following fields are encouraged to apply: molecular biology, molecular neuroscience, genetics, immunology, electrophysiology and imaging.

The candidate will enjoy intramural research support from the Stowers Institute with support from core facilities that provide advice, training and service to enhance the Institute's interdisciplinary and collaborative research programs. Current core facilities are staffed by over 100 scientists with expertise in bioinformatics, cytometry, histology, imaging, microarray, next generation sequencing, transgenic and ES cell technologies, proteomics and molecular biology. The Stowers Institute offers highly competitive compensation package including full medical, dental and vision insurance, as well as retirement benefits. Salary starts at \$39,000-\$45,000 and is commensurate with qualification, level of experience and expertise. For further information please visit: www.stowers.org.

Please send resume and letters of reference to Dr. Ron Yu at cry@stowers.org
